

Save Time and Reduce Costs With the Nation's Largest eRecording Network

Ingeo provides a secure, web-based eRecording service that enables submitters to electronically file real estate documents with county recorders across the country.

Submitters and counties save time and money in the following ways:

- § Reduce costs for labor, postage, courier, and materials
- § Shorten time gap to recordation
- § 100% security sending and receiving documents
- § Eliminate payment errors of county fees
- § Improve tracking of documents
- § Reduce document errors and rejections
- § Reduce consumption of fuel, electricity, paper, and other resources

Level 2 and Level 3 eRecording:

- § L2 - a scan of the original paper document submitted with a few data items for indexing
- § L3 – Submitters input or transmit data into Ingeo's system to create electronic lien releases and assignments. Submitters electronically sign, notarize, and submit the document to counties for recordation via the Ingeo network.

A PC, an internet connection, and a scanner/printer are that is needed to begin eRecording. Simple to set up and easy to use, Ingeo's eRecording system requires no additional hardware or software.

Ingeo is the choice of the nation's top banks, title companies, and mortgage firms to optimize the highest cost savings available in eRecording.

Ingeo is the recognized leader and innovator in the eRecording industry. With Ingeo, you're assured the eRecording process and documents are in full compliance with state and federal law, and industry standards. Our system features state-of-the-art technology and a responsive, experienced staff to support your business.
